Hello

This is YB Adviser Julie Galvin from Cardozo High School. I am writing because we are having a problem with one of our cameras and I was hoping you could advise us on what to do. It is a relatively new Canon Power Shot SD 750 Digital. One of our Sports Photographers had been using it for a few weeks when the screen went white. It still takes photos, but you cant aim the camera nor can you see what youve taken due to the white screen. Do you have any idea how we could fix this? We have very few cameras and are in a real bind.

Also, just wanted to tell you the Senior Portraits and the Faculty photos really came out beautifully. We love them.

Any assistance you could provide regarding the repair of the camera would be great.

Thanks very much!
Julie
